

#WeAreGEEK

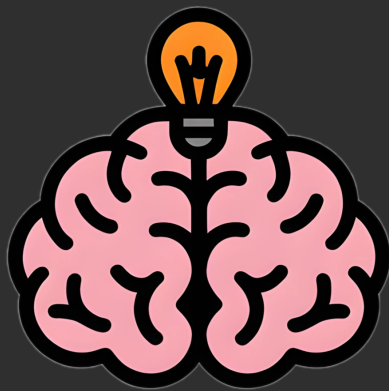

ABOUT GEEK!

GeekCoin - is a cryptocurrency on the Ton network designed to incentivize skill and knowledge sharing in the global education ecosystem. This token will be used to incentivize educational courses, mentoring, sharing professional services, and to reward users for developing their skills. With GeekCoin, you can not only learn, but also teach, get rewards for teaching others or even for practicing what you have learned.

GeekCoin's mission is to create an innovative platform that allows users to share knowledge and skills through transparent and secure transactions, providing value to both learners and educators. We aim to create an ecosystem that contributes to the continuous improvement of education quality and human capital development on a global level.

TECHNOLOGY

GeekCoin uses the TON network to ensure high speed and low transaction costs. The blockchain technology ensures transparency of all activities in the system, allowing to track the progress and integrity of knowledge exchange processes.

TON - is an innovative blockchain system that combines speed, security and scalability, enabling the development and launch of decentralized applications and cryptocurrency solutions. Every year the network evolves, offering more and more opportunities for users and developers around the world.

MAIN FEATURES

- **High Performance:** The TON (The Open Network) is capable of processing up to 1 million transactions per second, allowing the GeekCoin platform to operate quickly and efficiently.
- **SCALABILITY:** The system is built in such a way that it can be scaled to support a large number of users, training courses and educational projects.
- **SECURITY:** All data and transactions are secured using advanced cryptographic methods to ensure user safety and prevent fraud.
- **INTEGRATION WITH VARIOUS EDUCATIONAL SERVICES:** The GeekCoin platform is open to integration with online courses, learning platforms and educational institutions to create a more convenient and flexible interaction.

GEEKCOIN ECONOMY

Total number of tokens:
300 000 GEEK

TOKEN DISTRIBUTION

PRE-SALE - To attract investors at an early stage of project development, some tokens are allocated for pre-sale. This gives early investors the opportunity to purchase tokens at a lower price. Access to the pre-sale is available on our website 150 hours before the listing. To participate in the pre-sale you need to have a Ton wallet and between 10 and 1000 Ton on your balance. You need to provide your e-mail and Ton wallet, where you want to receive GeekCoin after the listing. Coins will be credited to your balance within 5 hours after listing, provided that the data you entered is correct.

AIRDROP - is a way to distribute tokens to a wide range of people to attract attention and build a user base. Terms of participation in the airdrop contest: Within a month before listing and two weeks after listing, you should send an email to geekcoin.inc@gmail.com with a story about what you have achieved in science or your work recently. Don't forget to include your cryptocurrency wallet where the reward should be credited. If your story impresses our team, an airdrop will be sent to you. Attach photo or video proof to your story, this is necessary to avoid scams

TEAM DEVELOPMENT - a part of tokens is allocated to the team that develops the project. These tokens can be blocked for a certain period of time (vesting) to motivate the team for long-term work and project development.

TOTAL TOKENS: 300 000 GEEK	%	AMOUNT (GEEK)
PRE-SALE	15	45 000
AIR-DROP	10	30 000
TEAM DEVELOPMENT	15	45 000
